ACTIVITY SHEET

BIRTHDAY GARDEN

Welcome to Yaloo's underwater seaweed garden! Yaloo is an artist from South Korea who uses technology to create art. She likes to think about how and why Korean traditions have become popular around the world. Have you tasted kimchi or listened to K-pop?

To create this artwork, she has been inspired by our past (our elders), present (ourselves) and the future (our younger generations). Yaloo looks at the different ways we experience other cultures.

K-POP DANCE

Yaloo has been working with two members of University of Liverpool's K-pop Society, Anna and David, to create a new K-pop dance.

They had interesting conversations about how they feel about K-pop, how they use social media and how, thanks to the internet,

they have friends all over the world. Anna and David used these conversations as inspiration to create the dance moves.

To learn the choreography, open up this Activity Sheet!

Which social media do you use?
What do you use it for?

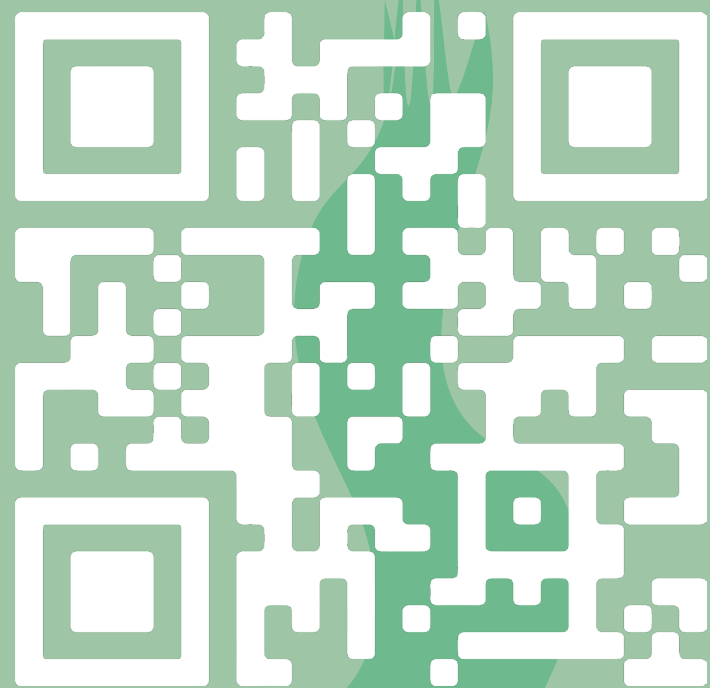

Would you like to become a famous influencer? Why?

Why do you think people get obsessed with music from different parts of the world?

If you enjoy learning the K-pop dance or would like to learn the steps with us, come along to a K-pop Celebration event Saturday 24 September at 17:30. We will be getting ready to dance around the city together.

Visit fact.co.uk/kpop for behind the scenes content, performances and tutorials.

Are you ready to learn a K-pop dance routine? Scan the QR code to begin.

Watch the step-by-step tutorial to master the moves. You can use this activity sheet to remember the steps, demonstrated by members of Unity Youth Club.

Are you stuck? Ask our team for help! Tag @fact_liverpool in your videos to share your moves.

Thanks to the Anna Franco and David Hitchmough from the University of Liverpool K-pop Society, and Mia Deakin (SpongeBob), Magda Felipa DeFreitas Mendoca (Dori), Ilesha Deakin (Anemone), Sofia Rose Deakin (Seaweed) and Donnaya Panton (DD) from Unity Youth Club's K-pop group, O!Hana.

ACTIVITY SHEET

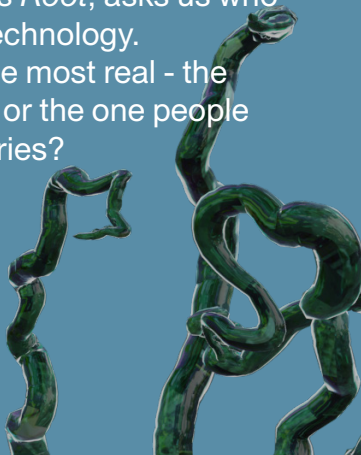

LOTUS ROOT

Welcome to Sian Fan's sanctuary of lotus flowers!

Sian uses movement (from the body and 3D video game characters) to experiment with the ways in which people interact with technology. She likes to think about the ways women are represented in animation and fantasy games. Sian's work in the exhibition is inspired by female characters like Sailor Moon.

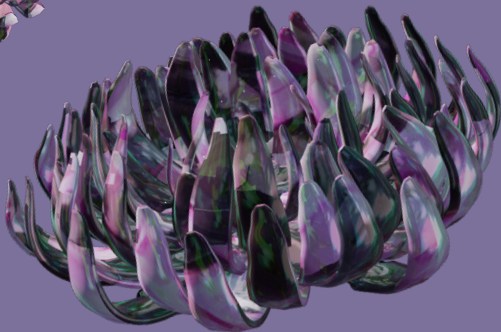

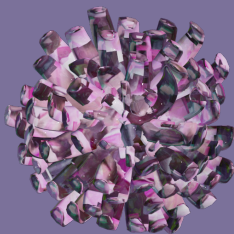

One of her artworks, *Lotus Root*, asks us who we are and how we use technology. Which version of you is the most real - the one you see in the mirror, or the one people see in your Instagram stories?

ACTIVITY: DIGITAL DUET

Sian invites you to add to her artwork by getting creative with augmented reality. She has created 5 brand new Instagram filters for you to use.

You can create your own scenes in the gallery, at home, or out in the world - anywhere that inspires you!

If you have Instagram or Facebook,
scan the QR code above to try
out the filters.

You can also use the tablets inside the gallery
or visit fact.co.uk/activity

THE AVATARS

Tap your screen to place the filters in unusual places.

Where could you plant the lotus flower?

Where are the tentacles growing out from?

Zoom in and out with two fingers to take a closer look.

How do they change when they are big and small?

Can you dance with the digital dancer?

Take a photo or video of your unique scene and tag @fact_liverpool in your creations!
